

Company Profile

Compañía Española de Petróleos, S.A. (CEPSA) is an industrial group whose activities span the entire oil value chain, ranging from the exploration and production of hydrocarbons to the marketing of petroleum products.

The Company additionally has a world-class chemicals division that is tightly integrated with its refining segment, manufacturing and selling feedstock for the production of value-added components used in a wide variety of industries.

With a long and proven track record in the oil sector, CEPSA is also involved in other energy-related businesses, such as natural gas operations and electric power generation and sales

CEPSA strives to make sound, reliable and efficient management of its industrial activities compatible with society's concerns and expectations. The Company is committed to acting responsibly in all phases of its activities, consistently adhering to the highest standards of conduct, corporate citizenship and environmental excellence, while making a positive contribution to economic growth and development.

KEY ASSETS:

Exploration & Production

Crude oil and natural gas exploration and production

Algeria:

- Block 406 A: RKF and OURHOUD oilfields
- TIMIMOUN Block

Colombia:

- 18 exploration contracts, 12 operated by CEPSA
- 2 production contracts, one operated by CEPSA
- Location: Llanos Basin and Upper Magdalena River Valley

Egypt:

- South Alamein*, North Bahrein and Abu Sennan* Blocks

Peru:

- Blocks 104, 114, 127, 130* and 131

Spain:

- Concessions in the Mediterranean (offshore Tarragona)

(*) Pending formalization by corresponding authorities

Refining, Distribution & Marketing

Refining of crude oil, distribution and marketing of petroleum products

Spain and Portugal:

- 3 refineries. Total capacity: 21.5 million t/year
- Asphalt refinery (50%). Total capacity: 1.5 million t/year
- Over 1,800 service stations
- Over 850 shops at service stations
- 4 marine fuel supply facilities
- 7 aviation fuel supply stations
- 7 terminals for the manufacture and distribution of asphalt derivatives
- 1 plant for the production of base oils and paraffin oil
- 1 plant for bottling finished lubricants
- 11 facilities for filling canisters, storing and transporting butane and propane

Panama and Morocco:

- Marine fuel supply

Petrochemicals

Manufacture and sale of petrochemical products

Spain:

- 3 petrochemical plants

Canada:

- 2 petrochemical plants

Brazil:

- 1 petrochemical plant

Italy, Great Britain, Belgium, Portugal and the Netherlands:

- Storage and marketing of petrochemical products

Gas & Power

Production, purchase and sale of electricity and natural gas. Construction and operation of gas pipeline

Spain:

- 5 cogeneration plants
- Authorized power: 230 MW
- 50% of a combined cycle power plant: 780 MW
- 20% of the MEDGAZ pipeline
